Title: Environmental Manager (Title V Specialty)

Location: Ohio

Position Summary: Responsible for developing, implementing, and maintaining plant environmental programs, with strong focus on Title V and other air permits; additional responsibilities will be assisting with RCRA, Storm water, POTW permits and ISO 14001. Responsible to assure compliance with all local, state and federal regulations and company policies. This position reports to the Plant Manager, will be part of the plant management team, and has 1 direct report.

Duties and Responsibilities:

- Serve as Complex expert in regards to site Title V air permit and associated compliance plans, ensuring all reporting is completed in an accurate, timely fashion and complex operations personnel understand and maintain compliance to the permit.
- Collaborate with local management team to ensure the complex meets all local, state, and federal regulations and is properly permitted, especially as it relates to Title V, and other air permits. RCRA, Storm water, and POTW permits as well.
- Continually maintain an appropriate level of awareness, knowledge and preparedness across the Complex to create a culture that prioritizes compliance to all environmental regulations.
- Review internal environmental policies and practices to ensure they are current and appropriate (including ISO 14001); conduct risk assessments and change existing, or develop new recommendations from these assessments.
- Responsible for the development of an annual budget recommendation and implementation.
- Assist in investigation of all incidents (i.e. deviations, malfunctions, releases, spills, etc.) and ensure proper records are completed and submitted. Assist in implementation of corrective actions as it relates to the incident and ensure proper procedures are communicated throughout Complex.
- Devise, supervise and coordinate training programs or media which will increase proficiency in safe practices and promote environmental consciousness.
- Address specific reporting and record keeping requirements as well as other pertinent regulatory compliance matters and to ensure Complex sites are in compliance.

- Stay abreast of current and emerging technical and professional aspects of this position.
- Conduct site audits
- This position manages subordinates and is responsible for the overall direction, coordination and evaluation of employees.

Education and experience required:

- Bachelor's Degree in Environmental, Engineering or other related Sciences
- Title V permit and program experience required
- 7 or more years of experience managing environmental programs, practices, regulatory agency requirements and industry standards while directly employed in a manufacturing environment.
- Personnel and/or department supervision experience preferred.
- Experience with reporting and record keeping
- Ability to communicate across all levels of the organization.
- Microsoft Office (Word, Outlook, Excel (advanced skills) and PowerPoint)

PREFERRED QUALIFICATIONS

- SAP experience
