Title: Global EHS Operations & Construction Manager

Location: Indiana

Position Summary: The Global EHS Operations & Construction Manager will be responsible for managing day-to-day EHS compliance across the company. The company owns and operates a diverse and growing portfolio of electricity generation and distribution businesses, which provide reliable, affordable energy to customers in 15 countries. The company understands that a reliable, affordable supply of electricity is essential to human progress, economic growth, public health and security. Their power plants encompass a broad range of technologies and fuel types, including coal, diesel, hydropower, gas, oil, wind and biomass. Their utilities power several diverse markets, from Brazil South America to Indiana USA. Combining deep local insight with a global presence and more than 30 years of experience, the company has a proven commitment to ensuring operational excellence in providing electricity to its customers.

Duties and Responsibilities:

- Support activities and efforts around EHS-related incidents and investigations.
- Technical resource and adviser on global EHS standards, policies and procedures
- Maintain and continually improve the EHS Management Systems (EMS and SMS).
- Develop and deliver EHS related training.
- Contribute to achieve EHS targets in support of business objectives.
- Proactively improve the quality of EHS data reporting and analysis
- Manage all aspects of environmental compliance across global operations
- Provide technical support to global businesses to compile EHS operating data and various reports for transmittal to government agencies and other stakeholders, for example: Hazardous Waste, Tier II, PCB, OSHA Log.
- Implement and participate in EHS internal and external governance activities.
- Maintain and ensure compliance with environmental permits, including Air, Title V, Asbestos, UST, etc.
- Sustainability and SEC Reporting.
- Company online reporting, data validation and improvement.
- Technical resource and adviser on global EHS standards, policies and procedures.
- Other duties as assigned.

Education and other requirements:

- Bachelor's degree in EHS, Environmental Science, Engineering, or science-related field; advanced degree preferred. Five (5) years minimum related experience in EHS compliance in a large industrial, processing, or manufacturing environment
- Experience in Power Delivery business (preferred).
- Multi-media environmental permitting and reporting experience.
- Multi-media environmental auditing experience.
- Direct experience with occupational health and safety and environmental regulations
- Additional consideration given to the following experiences: Spill remediation and SPCC, DOT regulations, PCB waste disposal, Environmental License/Certifications, Waste sampling techniques and analyses, incident investigation, Experience communicating with regulators (OSHA and EPA).
- Passion for Environmental Health and Safety
- Excellent organizational, project, planning & time management skills.
- Ability to work under pressure to meet deadlines.
- Able to work supportively and collaboratively with other teams.
- Ability to build effective relationships
- Effective communication and organizational skills.
- Demonstrated strong project management skills.

Frequent travel, including internationally, may be required.
