**Title:** Senior Environmental Engineer

**Location:** Cleveland OH

**Position Summary:** Position reports to the Environmental Manager. The Sr. Environmental Engineer actively provides leadership, counsel, and performs as an effective facilitator to influence development of a proactive approach to environmental compliance, program management, Continuous Improvement programs, and will provide technical guidance regarding environmental issues, compliance, and environmental performance. Ideal candidates enjoy hands-on, challenging, family-like environments and are looking for opportunities to develop further in their career.

**Duties and Responsibilities:**

- Manage various aspects of environmental services, with a focus on the Title V program, and be familiar with all other major environmental disciplines, including water, solid waste, SARA, etc.
- Interpret environmental regulations and determine impact to facility
- Advance superior conformance through root cause analysis and management of necessary corrective actions to prevent recurrences
- Function as key member of the ISO 14001 Environmental Management System (EMS) implementation and certification process
- Develop and implement environmental strategies, plans and procedures
- Interact with various local, State and Federal Environmental agencies
- Prepare appropriate internal and external reports and timely submit utilizing proficient computer skills, including Microsoft Office, as well as various internal computerized systems
- Provide direction and oversight to environmental contractors
- Provide technical direction and conduct environmental employee training
- Direct and supervise contractors and consultants
- Conduct internal environmental audits

- Assist with the development and implementation of corrective action plans
- Manage environmental projects
- Participate in rotating on-call responsibilities, including ability to respond to environmental emergency situations twenty-four hours a day
- Prepare federal, state and local permit applications
- Interact with agency regulatory personnel and the general public
- Work independently and handle multiple priorities

**Education and experience required:**

- Bachelor's Degree in Engineering or equivalent or related discipline
- A minimum of five years of professional experience in an environmental related discipline including Title V and knowledge of Federal and State environmental laws and regulations and of ISO 14001 Environmental Management System standard
- Problem solving, facilitation and implementation skills
- Strong verbal and written communication skills

***Preferred Requirements***

- Bachelor's Degree in Chemical Engineering, Environmental Engineering, or related discipline preferred
- Eight (8) to ten (10) years of professional experience in an environmental related discipline as noted above.
