Title: US EHS Manager (2 positions)

Location: Indiana

Position Summary: The US EHS Manager will be responsible to provide leadership and technical expertise for EHS programs and initiatives across the company. Company owns and operates a diverse and growing portfolio of electricity generation and distribution businesses, which provide reliable, affordable energy to customers in 15 countries. The company understands that a reliable, affordable supply of electricity is essential to human progress, economic growth, public health and security. Their power plants encompass a broad range of technologies and fuel types, including coal, diesel, hydropower, gas, oil, wind and biomass. Their utilities power several diverse markets, from Brazil South America to Indiana USA. Combining deep local insight with a global presence and more than 30 years of experience, the company has a proven commitment to ensuring operational excellence in providing electricity to its customers.

Duties and Responsibilities:

- Contributes to development of EHS strategy and action plans for the Businesses through analytics in order to meet global targets, reduce risk and improve performance.
- Lead activities and efforts around EHS-related incidents and investigations.
- Work with the Businesses in coordination with the EHS representatives to implement corporate EHS programs.
- Maintain compliance with all applicable EHS regulations and requirements.
- Maintain and continually improve the EHS Management Systems (EMS and SMS).
- Develop and deliver EHS related training.
- Contribute to achieve EHS targets in support of business objectives.
- Act as an advisor and technical expert on issues related to EHS.
- Participate and provide input on US specific and corporate EHS initiatives.
- Organize exchanges inside the Business EHS network regarding experiences, good practices, and feedback to be used both in the Business and in the Company.
- Visit job sites to conduct safety inspections and audits.
- Other duties as assigned.

Education and other requirements:

- Bachelor's degree in EHS or related field required, advanced degree preferred.

- 5-10 years related experience
- CSP, CIH, CHMM (or similar) certification preferred but not required.
- Proven leadership skills.
- Experience in an electric distribution business or a power plant (preferred).
- Passion for Environmental Health and Safety.
- Ability to effectively communicate and influence at all levels of an organization.
- Ability to build effective relationships.
- Strong interpersonal skills.
- Ability to review, analyze and draw conclusions from data.
- Strong computer and analytical skills
- Ability to lead assigned tasks to closure while maintaining high level of professionalism.
- Able to work in a dynamic and fast-paced environment.
- Excellent organizational, project, planning & time management skills.
- Ability to work under pressure to meet deadlines.
- Able to work supportively and collaboratively with other teams.
- Able to build relationships and trust with key stakeholder.
- Demonstrates alignment with company values.
